Sexually Transmitted Diseases and HIV/AIDS: 704.432.1742 Regional Office 704.566.8990 • Communicable Disease Control Update newsletter email houselm@co.mecklenburg.nc.us

Suspected Foodborne Outbreaks: Bill Hardister 704.336.5533

Tuberculosis: Kristi McCray 704.432.2496

To obtain a supply of the North Carolina Communicable Disease Report Cards: 704.336.2817 • 919.715.7404

1. Figures subject to change, diseases **bold, italic and an asterisk*** are reported **immediately, bold & italic** within **24 hours** and 7 days for all others diseases.
2. The **cumulative** number for HIV Disease (not AIDS) is **5,499** in Mecklenburg County and 31,282 in North Carolina. This figure is based on reports of confidential testing done between January 1990 – December 2006. Please note a change reflecting recent changes in North Carolina reporting. "HIV Disease" refers to all people infected with human immunodeficiency virus, with and without an AIDS defining condition. Previously data were reported separately for HIV and AIDS. Currently AIDS cases are subset of HIV disease. AIDS case reporting began in the United States in 1981 and North Carolina in 1984. HIV infection reporting begin in North Carolina in January 1990 and HIV disease reporting in 2001. While all states report AIDS, all states do not report HIV infection or HIV Disease. As a consequence, national numbers for HIV disease are not available. The cumulative number for AIDS in the United States is 988,376 as of 2005.
3. No rabid animals this month
4. Morbidity cards do not always indicate Penicillinase-testing results. The PPNG number is included in the gonorrhea total.
